WEB DEVELOPMENT ASSIGNMENT : 21

Bootstrap Components Large Assignment Style Questions

---

1. Create Complete E Commerce Home Page Using Bootstrap Components

Create a full home page layout for an e commerce website. Page should include navigation bar, hero banner image, product cards section, offer alert banner, and footer. Use Bootstrap buttons, cards, badges, and images properly. Page must be fully responsive.
Hint: Combine Bootstrap Grid, Card component, Alert component and Button classes. Use badge on product cards for new or sale items.

---

2. Create Student Management Dashboard UI

Create dashboard page showing student data using Bootstrap tables, status badges, profile images and action buttons. Add alert message for success or error operations.
Hint: Use table component with badge for status like active inactive. Use small images inside table rows.

---

3. Create Blog Listing Page Using Bootstrap Cards

Create blog listing page where each blog is displayed using Bootstrap card with blog image, title, description, category badge and read more button.
Hint: Use responsive grid with cards. Add badge for blog category.

---

4. Create Product Comparison Table Page

Create page showing product comparison using Bootstrap table with product images, features list and buy buttons. Highlight best product using badge or alert.
Hint: Use table striped and hover classes. Add badge for best seller.

---

5. Create Notification Panel UI

Create notification panel showing different alerts like success, warning, error and info messages. Each alert should contain close button and icon or badge.
Hint: Use alert dismissible classes and badges for notification count.

---

6. Create Profile Card Section For Team Members

Create team section showing profile image, name, designation, status badge and social media buttons inside Bootstrap cards.
Hint: Use card with image top and badge inside card body.

---

7. Create Admin Panel User List Page

Create admin page showing user list using table with profile image, name, email, role badge and action buttons like edit delete view.
Hint: Combine table, badge and button components.

---

8. Create Product Detail Page UI

Create product detail page with product image gallery, product info card, price badge, stock alert message and add to cart button.
Hint: Use image classes, card layout and alert for stock availability.

---

9. Create Online Course Listing Page

Create course listing page showing course cards with course image, title, rating badge, price and enroll button.
Hint: Use card layout with badge for rating or level like beginner advanced.

---

10. Create Shopping Cart Table UI

Create shopping cart page showing product image, product name, quantity buttons, price and total price using table layout.
Hint: Use table plus button utilities. Add badge for offer discount.

---

11. Create News Portal Highlight Section

Create news section showing featured news using large card and normal news using small cards. Add breaking news badge.
Hint: Use grid plus card plus badge combination.

---

12. Create Login Success and Error Alert Demo Page

Create page showing form submission success and error alerts using Bootstrap alert component.
Hint: Use alert success and alert danger with dismiss option.

13. Create Image Gallery With Image Labels

Create image gallery using Bootstrap images and add badge labels like new trending featured on images.
Hint: Use position utilities with badges.

14. Create Order Status Tracking Table

Create order tracking page showing order id, product image, status badge like shipped delivered pending and action button.
Hint: Use colored badges for status tracking.

15. Create Job Portal Job Listing Cards

Create job listing page showing job cards with company logo image, job title, job type badge, salary and apply button.
Hint: Use card plus badge plus button components with responsive grid.
